

#Hiring2DayVT

Bradford, VT

Copeland Furniture has been sustainably producing wood products and furniture in Vermont since 1976. We remain family owned and committed to manufacturing in America. We continue to be true to our northern New England heritage, producing solid hardwood furniture of good design, quality, and value.

A traditional work ethic that embraces change

Over time we have changed from a one-man operation in an old garage in East Corinth, Vermont, to a state-of-the-art manufacturing facility located on the banks of the Connecticut River in Bradford. Using a combination of leading-edge computer technology and traditional craftsman technique, we are a company that is embedded in our local community and a place that provides a fulfilling work environment for the men and women who come to work here every day.
